

Bench Magnifier FM-BMR-A100

Overview

Bench Magnifier FM-BMR-A100 is a compact and lightweight magnifier allowed to magnify and illuminate objects on a flat surface. Crafted with a 5-inch high-quality glass lens for proper object illumination and eliminating shadows to improve visibility. Precision optics ensure clear distortion-free magnification.

Specifications :

Lens size	5inches
Diopter	3Diopter/5Diopter
Luminous flux	900Im
Color Temperature	6500K
Light Source	T9 22W Circular fluorescent lamp
N.O./CTN (pcs)	4
Power	22W
Voltage	100V/ 120V/ 220-240V
Dimensions	52 x26.2 x15.5cm
Net Weight	12.5 kgs
Gross Weight	14.5 kgs

Features :

- Table Clamp allows users to set at the desired height and angle for the perfect view
- Equipped with a circular fluorescent lamp to provide illumination
- Light Source supplied with electronic ballast
- Magnification level 3X appears three times larger than the original
- Optics are large and high-quality for comfortable viewing
- Dioptre refers to refractive index and each dioptre increases magnification by 25%
- Lamp is suitable for wall attachment
- High-Image quality, minimal distortion, and adaptable illumination

Applications :

It is used for exact visibility and magnifying of objects for detailed work in medical laboratories, Research, jewellery making and electronics.
