

Horizontal Single Stage Centrifugal Pump FM-HSCP-A100

Overview

Horizontal Single Stage Centrifugal Pump FM-HSCP-A100 is designed for precise operation with a capacity of 0.72 m³/h. It features a magnetic transmission structure that prevents leakage by operating without a shaft seal. The pump has a compact footprint, which allows for easy installation in limited spaces. Its durable 304 stainless steel construction provides long-lasting performance. Our energy-efficient centrifugal pump is a reliable choice for diverse industrial needs.

Specifications :

Capacity	0.72 m ³ /h
Head	140 m
Speed	2900 r/min
Efficiency	0.08
Power	5.5 kw
Length	880 mm
Width	340 mm
Height	380 mm
Weight	800 kg

Features :

- High head with small flow rate
- Low maintenance requirements
- Safe for hazardous liquids
- Explosion-proof motor
- Environmentally friendly

Applications :

Horizontal single-stage centrifugal pump is commonly used in industries such as oil and gas, chemical processing, and water treatment for transferring liquids with high pressure and low flow rates.
