

Industrial Dehumidifier FM-DHU-A100

Overview

Industrial Dehumidifier FM-DHU-A100 offers a 240L/D moisture removal capacity for effective humidity regulation. Our Dehumidifier has a temperature range of 5 to 38 °C which helps operating in various environmental conditions. Its automatic defrost system prevents frost accumulation ensuring uninterrupted performance. It is designed with an intuitive control board to enable smooth and efficient operation. Its high air volume capacity facilitates rapid moisture extraction for optimal air circulation.

Specifications :

Dehumidity Capacity	240L/D
Working Temperature	5 to 38 0C
Air Volume	2600m3/h
Power Consumption	5000w
Power Supply	220V/50Hz/1P
Dimension (LxBxH)	780x890x560mm
Gross Weight	95kg

Features :

- Durable metal body
- Compressor delay start
- Error code display
- Fault alarm function

Applications :

Our Industrial Humidifier is ideal for warehouses, factories, storage facilities and industrial environments to ensure moisture control.
